Desk Lighting Market Sizing

Summary

We estimate a serviceable market of 3.1 million premium task lamps a year across the United States, United Kingdom, Germany, and Japan, worth roughly $620 million at an average price of $200.

Arc needs one tenth of one percent of that in its first year.

Method

Step	United States	Rest of markets	Total
Home offices	38.0M	41.5M	79.5M
Replace a lamp each year	12%	10%	—
Premium share (over $120)	35%	30%	—
Serviceable lamps per year	1.6M	1.5M	3.1M

Caveats

Home office counts come from national surveys of differing years.

The premium share is taken from one retailer's category data and may overstate the market outside design-led stores.
